Headquartered in Atlanta, Georgia, Albion, Inc. has provided software development, consulting and training services to both public and private sector clients for over ten years. Albion is part of the Scandent Group, a \$300mm global provider of software and business transformation services. Albion, Inc. delivers solutions primarily to the Public Sector for E-government and enterprise systems applications. Our core offerings range from strategic consulting to application maintenance/support. Services include systems integration, customizations, testing and legacy application migrations.

In 2004 Albion made a commitment to providing solutions and services to the Courts vertical marketplace. This commitment includes the newly released Justice@Vantage product and the establishment of an organization with experienced Court Systems specialists. In 2000 we automated the New York State Sex Offender Registry (or NYSOR) for the New York State Division of Criminal Justice Services.

Courts find AlphaCorp's document management and agenda automation solutions among the best. Why? VP Kris Painter says, "The difference between SIRE and other products is SIRE's ability to simplify the world of document management and agenda preparation without losing the benefits and features courts demand. SIRE offers more standard features at a better price than any other product." We also know the importance of personalized service. Said one customer, "Our issues would have become insurmountable except for the willingness of AlphaCorp to listen to our needs and respond to them." Experience the AlphaCorp advantage today by calling (800) 793-1052 or visiting www.siresolutions.com.

eManage Law is a developer and provider of hosted online electronic court processing software. Our flagship product, EFS, is the first software suite to integrate collaborative web-based case management, electronic filing, process serving and web content management capabilities. Courts can offer EFS as a service to the bar, the public and third party agencies as a collaborative environment to manage cases, file documents and automate the delivery of court information to court websites from anyplace, anytime. EFS can be scaled from a single courthouse to a nationwide service, further enabling the courts to standardize services and maximize existing resources. Moreover, as a hosted service to the courts, today's budget conscious judiciary will not be required to make heavy investments in IT infrastructure. EFS provides the flexibility to help courts save money, enhance productivity, make better decisions, hold offenders accountable, forge new partnerships, add new revenue streams, and enhance public access to the justice system.
