CourtCallwww.courtcall.com**100**

CourtCall created the turn-key telephonic court appearance industry in 1995. Lawyers hoping to help reduce the cost of litigation know that clients save hundreds, if not thousands, of dollars each time their lawyers are not required to sit in traffic or jump on a plane for a brief appearance. CourtCall was created because there was a compelling need to make routine, non-evidentiary pre-trial appearances more cost effective for clients and more manageable for busy attorneys. Over 900,000 times in over 1,500 courtrooms across the country, CourtCall has enabled attorneys to seamlessly simulate an in-person court appearance with no discernible disruption in the business of the Court, all at no cost to the Court. For more information please call 1-888-882-6878.

Courthouse Technologieswww.courthouse-technologies.com**402**

We're revolutionizing jury management. Courthouse Technologies has nearly 50 years of combined experience developing solutions for jury management. We know that superior jury management systems are not crafted solely by computer programmers, but by dedicated specialists in the jury management field. Our flagship product, Courthouse JMS, is the first and only web-based jury management system commercially available. With its Microsoft Outlook-style, it's easier to use and maintain. Extensive configurability and personalization give rise to maximum flexibility, so that you can define the functions, preferences, shortcuts, views and themes you want to use, keeping it simple where it needs to be.

Visit www.cdscourts.com for more information.

DLR Groupwww.dlrgroup.com**616**

DLR Group is the No. 1 criminal justice design firm in the world, according to *World Architecture* magazine. Justice agencies from across the country rely on our experience in designing state of the art, award-winning federal, state, county and municipal facilities. DLR Group believes courthouses should convey essential testimony to the dignity of our government's judicial system. Courthouses demand clarity of architectural language and should represent the bold and dignified character of our contemporary judicial system in balance with our historic design fabric. Each DLR Group courthouse is as a testament to our commitment to outstanding justice facility design.

FTR Limitedwww.fortherecord.com**606**

FTR Limited is the leading global supplier of rich media asset management systems for courts, hearing rooms, public meeting and the law enforcement venues. Contact us at 1-877-650-0958 or visit us on the web at www.fortherecord.com to learn more about FTR and our products.

HDR Architecture, Inc.www.hdrinc.com/civic**202**

HDR has been responsible for the planning, design, and/or evaluation of more than 60 court projects containing more than 11 million square feet of court and court-related spaces. As design specialists, we

understand that a courthouse is a unique building which presents unique challenges to each discipline of a design team. Courts facilities are often significant architectural icons in a community making design a significant issue in these facilities. While function is significant, the facility must also express trust, history, compatibility with the surrounding area and the value of the justice system to our communities. Our mechanical engineers have mastered appropriate court zoning, controls and acoustic issues. Security communication and data systems are fully integrated and customized for "smart" court applications. Our designs focus on the need for flexibility in the modern courthouse. We focus on function, with the goal of providing the appropriate space and infrastructure to respond to the rapidly changing way that courts work. We apply a keen knowledge of ergonomics, ADA compliance and sight lines and are abreast of leading-edge technology systems within workspaces. Some of our individual professionals are recognized as national experts and are sought out to assist with creating design standards and manuals, post-occupancy evaluations and writing, editing and contributing to industry-recognized government publications. One example is the U.S. Courts Design Guide for the Administrative Office of the U.S. Courts and the GSA. HDR has contributed to every edition since 1989.

Heery International

www.heery.com

203

Heery International's seasoned professionals have been responsible for the design of more than 20 federal courthouses and dozens of county and municipal court complexes. Laserfiche

www.laserfiche.com

403

Laserfiche® document and records management solutions help courts guarantee the integrity of case files, improve clearance rates and reduce the overall cost-per-case. With Laserfiche, the entire case file—from documents and e-mail messages to photographs and digital video recordings—resides in a secure electronic repository. Comprehensive search tools help staff quickly find what they need, while robust security protects confidential information from unauthorized access or release. Because Laserfiche automates manual processes, courts realize greater staff efficiency and reduced costs. And secure Web access helps courts easily share information with judges, lawyers and staff, which speeds the time to case disposition.

Linebarger Goggan Blair & Sampson, LLP

www.publicans.com

502

Linebarger Goggan Blair & Sampson, LLP has been helping its government clients collect their delinquent receivables for over 30 years. Linebarger Goggan's clients include the federal government and more than 1,800 cities, counties, school districts, states and various other public and private entities throughout the country. The firm collects a variety of receivable types for its government clients, including taxes, fees, fines, service charges, tolls, healthcare, and other local, state and federal government receivables. With the firm's help, its clients are better able to avoid unnecessary tax increases and, more importantly, more likely to have the revenue needed to pay for critical services. Firm's principal office: Austin, Texas. The attorney responsible for the contents of this advertisement: Mike Vallandingham.

Multi Business Systems

www.multibusinesssystems.com

608

Multi Business Systems provides print and mail services for courts across the nation. We design your summons to meet you needs. We can receive files from any software; verify totals, image and mail within 24 hours. Potential jurors have the summons in an average of 72 hours from when the file is sent. Multi Business Systems can also correct the potential juror addresses sent against the Postal data base so the summons go to the correct addresses the first time. The corrected addresses are returned to you so your data bases can corrected manually or electronically and all corrections are Postal compliant.

National Center for State Courts

www.ncsconline.org

The National Center for State Courts, founded in 1971, provides research, information, education, and consulting services to state courts and courts around the world. For more than 35 years, the NCSC has helped courts plan, make decisions, and implement improvements that save time and money while ensuring judicial administration that supports fair and impartial decision making. NCSC is an independent, nonprofit court improvement organization founded by the state chief justices at the urging of Chief Justice of the Supreme Court Warren E. Burger. Chief Justice Burger envisioned NCSC as a clearinghouse for research information and comparative data to support improvement in judicial administration in the state courts. More than 20 years ago, the Institute for Court Management (ICM) merged with NCSC, adding an educational curriculum designed for court managers. In the early 1990s, an international services division was created to strengthen the rule of law in countries around the world. NCSC is headquartered in Williamsburg, Virginia with program offices in Denver, Colorado and Arlington, Virginia.
